

BIO-SEED STARTER

Dry Applied Lawn Product

Bio-Seed Starter contains complete protein amino acids, carbohydrates and select polysaccharide microbial food sources in a balanced paramagnetic base.

Contains Non-Plant Food Ingredients

* Humic Acid.....	3.40%
* Protein	18.00%
* Carbohydrate	16.50%

INSTRUCTIONS for Use:

1. On newly seeded areas, apply using a steel-gear rotary spreader at the rate of 10 lbs. per 1000 sq.ft. right on top of seed after it has been raked into soil. Where hydroseeding is employed, apply over top of area seeded.
2. Renovation or slit-seeding of existing grass areas: If necessary, power rake area to remove thatch. Follow by slit-seeding at 1/4 to 3/8 inch planting depth into soil, then apply Bio-Seed Starter at 10 lbs. per 1000 sq.ft.

Note: For proper germination of seed, follow a good watering routine.
